

Resume Analysis Report

JD Match: 75%

Missing Keywords:

- Data Analytics Platforms
- Experience with Usage and Application

Profile Summary:

Rohit Ray is a Data Scientist and ML Engineer with strong proficiency in data analysis and visualization, leveraging Python, SQL, and TensorFlow. His expertise lies in data preprocessing, predictive modeling, and feature engineering. Rohit has a proven ability to deploy high-accuracy machine learning models and develop user-friendly applications for impactful data insights. He possesses a solid understanding of SQL, NLP, machine learning techniques, and various tools and frameworks. Rohit's projects demonstrate his skills in customer retention analysis, academic performance analysis, facial expression mood prediction, and image generation using Stable Diffusion. Additionally, his participation in workshops and extra-curricular activities showcases his commitment to continuous learning and leadership within the tech community. However, his resume could benefit from highlighting specific experience with data analytics platforms and emphasizing the application of data analytics tools in his projects.
